EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The title has been re-written as follows:

-- Display device of reduced size including a point light source provided at an end of a display area--

Allowable Subject Matter

2. Claims 1-6 and 8-13 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. The prior arts of record do not anticipate or render obvious to one skilled in the art a display device or an image forming apparatus including the display device wherein the display device comprising various elements as claimed, more specifically a first member and a second member disposed opposite to each other with a liquid crystal interposed there between, wherein the first member has a rectangular display area, the second member has a display corresponding area corresponding to the rectangular display area and a non-display corresponding area which is different from the display corresponding area, a guide member for guiding light from the point light source wherein the light source is provided not beyond a width of the first member and at an end of the display area, with respect to the longitudinal direction of the display area.
5. The newly cited references, US 2004/0114069, US 2003/0164903, USPAT 6,669,350 and JP 2003100132discloses a light guide plate for guiding light from a point light source. Further, US 2002/0167626 discloses a display device comprising a first member and a second member disposed opposite to each other with a liquid crystal interposed there between, wherein the first member has a rectangular display area, the second member has a display corresponding area corresponding to the rectangular display area and a non-display corresponding area which is different from the display corresponding area and a guide member for guiding light from a light source. However, none of the prior art references alone or in combination with any other references teach
